## WEB ENGINEER

My name is Sean. I'm a web-engineer that's passionate about how small groups of people can leverage technology to change the world in big ways. Areas that I find personally interesting include sustainable energy, biotechnology and the reversal of aging, and the global currency wars. When I'm not working, you'll find me reading up on something cool, playing through a new video game, or enjoying the outdoors with friends. If you're looking for a candidate that's a team player, eager to learn, and searching for an exciting new challenge, then inquire within!

---

## Key Skills

**FRONT-END:** HTML, CSS/SASS, JavaScript, jQuery, React, React-router, React Native, Redux

**BACK-END:** Node.js, Express, MongoDB, Mongoose, Socket.io, EJS Templates

**OTHERS:** NPM, Webpack, Git, Mocha, Chai, Heroku/GitHub

---

## Projects

[Financial Fantasy](#) – a stock market-oriented game utilizing MongoDB, Node.js, Express, and React/Redux. Updates prices every 10 minutes, and allows users to create and win contests.

[Wedux](#) – a simple weather application built using React/Redux.

[Stock Overflow](#) – an educational introduction to the stock market. Allows users to view high-level financial data and manage their own portfolio.

---

## Experience

### WEB DEVELOPER | FREELANCE WEB DEVELOPMENT (2016 – Present)
